

## **DOM Presentations - Industry Disclosure Requirement Policy**

The Department of Medicine requests Program Directors comply with the following to ensure faculty who lecture to trainees (students, residents and/or fellows) disclose conflicts of interest and act to minimize the risk of bias in their presentation:

1. Faculty must include the DoM disclosure slide at the start of all presentations to trainees, even if there are no perceived conflicts.
2. Faculty will use generic drug names only.
3. Faculty will identify off-label drug recommendations in general, even if no conflicts are present.
4. Program Directors will ensure their program's speaker evaluation form asks about bias in the speaker's presentation.
