### MESSAGE FROM THE DIVISION DIRECTOR

#### Strength in Numbers and Working Together across the University

The Faculty of Medicine, University of Toronto, ranks extremely high in all surveys that compare university faculties of medicine internationally. This high ranking also applies to most of the departments and divisions within the faculty of medicine, including the U of T Division of Endocrinology, one of the largest and most productive in the world. I have no doubt that much of that success is attributable to the hard work and achievements of the extremely talented faculty members, outstanding leadership, resources and the advantage of being located in a geographically favourable, large, multicultural, very livable, international city. In addition, size definitely matters in international ranking systems. This is not simply a matter of the math of adding up total research output and funding received, without consideration for denominator. More to the point, the academic activities (research, teaching and clinical care) of the faculty/department/division are all greatly enhanced by the concentration of brain power and resources in a single geographical location.

Research in particular can rarely be conducted successfully in isolation. Researchers benefit enormously from access to core facilities, shared equipment, the cross current and sharing of knowledge between adjacent labs, intramural funding opportunities (such as the BBDC in our division's case), seminar series that attract international speakers, etc. Our teachers benefit from access to very talented trainees, clinical rounds, teaching improvement courses, evaluations, oversight and interactions with other great teachers in our division and department. Clinicians benefit from the great variety of clinical experts in other fields who are available for consultation, referral and who share their knowledge at our many rounds and in curbside consultations.

Those working in various areas of our division have benefited from citywide working groups in areas such as Diabetes in Pregnancy, Quality Improvement and Continuing Health Education. There is a close link between the division and the Banting and Best Diabetes Centre, which has recently developed programs in International Outreach, Population Health, Knowledge Translation, Professional Development and Continuing Health Education, not to mention the many aspects of diabetes discovery research.

Although I understand the pride that we all take in our base hospitals and their affiliated research institutes, and so we should, it is counterproductive, outmoded and unhelpful for us to compete between these silos in the 21st century. We should take a dim view of comparative statistics of the research achievements of members of our division in one compared to another of our U of T hospital divisions or research institutes. There is so much more to be gained if we take pride in the combined achievements of the U of T division and if we collaborate and co-operate across the U of T division. Try it and you will find that it is wonderful to take credit for ALL of the activities of our colleagues across the U of T Division, rather than a handful of colleagues at our base hospital and research institute, however accomplished they are. In this spirit you can be assured that the Division of Endocrinology executive, comprising the DDD, heads of hospital divisions and program director, functions in a cohesive, non-competitive, collaborative fashion in all major activities, particularly in the all-important recruitment of new faculty to the Division.

Gary Lewis  
 Director, Division of Endocrinology, U of T

#### Other Divisional News

#### **University of Toronto Division of Endocrinology Quality Improvement Committee**

Chair: Dr. Jeannette Goguen, St Michaels Hospital  
 Members: Dr. Phillip Segal, University Health Network/Mount Sinai Hospital

Dr. Ilana Halperin, Sunnybrook Health Sciences Centre  
 Dr. Geetha Mukerji, Women's College Hospital  
 Dr. Maria Wolfs, St Michaels Hospital

This divisional committee was recently formed to address the growing need for scholarly productivity in Quality Improvement (QI) and Patient Safety within the department of medicine at the University of Toronto. Each member has an academic interest in this evolving field, and together we represent the core academic endocrinology programs at the University of Toronto. The goal of our committee is to raise the profile of our division in QI by collaborating on clearly defined, city-wide initiatives. Above all we hope to provide practical and timely deliverables to improve clinical care across the division.

As such, we have recently been awarded a grant from the Sunnybrook AFP fund to develop a university-wide balanced score card that defines quality in diabetes care in the academic setting. Despite an enormous knowledge base derived from clinical trials, effective clinical tools, and evidence-based clinical practice guidelines, the quality of diabetes medical care across Canada is highly variable and well defined indicators and benchmarks are lacking. How do we measure and promote high quality, effective and practical diabetes care?

We hope to address this gap through a multisite collaboration that engages stakeholders at every level in order to establish a balanced scorecard in diabetes that encompasses all the 6 domains of quality (safety, effectiveness, patient-centeredness, timeliness, efficiency, and equitable care). Most importantly, patients will be involved throughout the process, to reflect the importance of their personal experience with diabetes. By incorporating input from patients, health care providers and administrators, we hope that the final scorecard will not simply be informed by published evidence, but also be a practical and feasible tool that will reflect the priorities of all interested parties. The ultimate goal is to use the scorecard to benchmark performance in the 6 domains of quality across our academic institutions. The data will then be used to inform local and city wide quality improvement initiatives.

#### **HONORS AND AWARDS ANNOUNCED IN THE PAST 6 MONTHS (SINCE Fall 2013 NEWSLETTER)**

##### **Teaching Awards:**

**Jeannette Goguen** – recipient of the 2014 Canadian Association for Medical Education (CAME/ACÉM) Certificate of Merit Award

##### **Special recognition for Research:**

**Daniel Drucker** was awarded the highly prestigious 2014 biennial Oon Award and Lecture, University of Cambridge, UK. This award and lecture honours distinguished researchers in preventative medicine.

**Daniel Drucker** is the 2014 recipient of the American Diabetes Association's Banting Medal for Scientific Achievement Award. The Banting Medal is the ADA's highest scientific award and honors an individual who has made significant, long term contributions to our understanding of diabetes, its treatment and/or prevention.

**Susan George** is the 2013 recipient of the Heinz Lehman Award of the Canadian College of Neuropsychopharmacology (CCNP).

**David Jenkins** made an Officer of the Order of Canada

#### **RESEARCH GRANTS**

##### **Operating Grants**

**Tony Lam** - Canada Foundation For Innovation (CFI) Leaders Opportunity Fund – The in vivo metabolic characterization laboratory (Principal Investigator, \$1,917,912

**Ilana Halperin, Geetha Mukerji, Phil Segal, Jeannette Goguen, Maria Wolfs** received a 2013-2014 Sunnybrook Innovation Funding Grant for \$86,873 for their project titled 'Developing an Innovative Balanced Scorecard for Quality in Diabetes Care'

##### **CIHR Sept 2013 Operating Grant Grantees**

ADVANI, Andrew	JAK2 and podocytes in diabetic nephropathy. <a href="#">Details...</a>	\$672,439	5 yrs

**DIVISION MEMBER PROFILE – Iliana Lega, Women’s College Hospital**

Iliana was born in Romania and grew up in Toronto, where she moved to just after her first birthday. She completed a Bachelor of Science degree with a double major in World Religions and Biology at the University of Toronto. After briefly considering a career as a religious scholar, Iliana decided to instead pursue an MD at the University of Western Ontario. After four years in London, Ontario, Iliana moved to Montreal to complete specialty training in Internal Medicine and Endocrinology and Metabolism at McGill University. During this time, Iliana interrupted her fellowship to spend 5 months living in Ecuador, where she learned Spanish and pursued her global health interests by working with a local NGO and developing a curriculum for teaching sexual health at a rural school. In 2010, she moved back to Toronto to begin a Women’s Health Research Fellowship at Women’s College Hospital. In 2013, Iliana completed a Master’s Degree in Clinical Epidemiology through the Institute of Health Policy, Management, and Evaluation at the University of Toronto. She will formally join the Division of Endocrinology at WCH as a Clinician Scientist at the end of this year.

Iliana has a long-standing interest in issues related to endocrinology and women’s health. She has conducted research on women with gestational diabetes as well as explored the link between diabetes and breast cancer in women. Specifically, her Master’s thesis explored the relationship between metformin therapy and survival following breast cancer among diabetic women. In support of her research, Iliana was awarded a 3-year physician fellowship award from the Canadian Breast Cancer Foundation in 2011. In future projects, Iliana would like to continue using ICES databases to explore the effect of metformin on cancer stage at presentation, as well as to examine the temporal relationship between cancer and diabetes diagnoses.

In her clinical work, Iliana is excited to be involved in three multi-disciplinary clinics in conjunction with staff from the Department of Obstetrics and Gynecology: the Adult Turner’s Syndrome Clinic at WCH, the Premature Ovarian Insufficiency Clinic at Mt Sinai Hospital, and the new Adult Disorders of Sexual Differentiation Clinic at WCH. She will actively be involved in both the clinical and research aspects of these clinics. Iliana will also take on the research lead in the After Cancer Transition Treatment program at WCH and thus continue her work in cancer survivorship. In terms of teaching, she has been actively involved in leading MNU seminars and is passionate about teaching her rotating residents and students in the clinical setting.

Outside of work, Iliana enjoys her family life with her husband, Rajesh Girdhari, a family physician and future public health specialist, and their 1 year-old daughter, Adalena. Though life with a baby has left her with less time for personal pursuits, Iliana is a self-proclaimed film buff (especially foreign films) and would like to continue perfecting her pottery and gardening skills. Iliana and Rajesh were members of a champion ultimate Frisbee team in the past and still enjoy playing together when they can find a babysitter! Iliana and Rajesh are also avid travelers and are excited to continue their explorations with Adalena at their sides.

*Iliana, Rajesh and Adalena in Grenada on their most recent vacation (March 2014).*

Select item 2394061689.

[Role of PTPs in the destruction of periodontal connective tissues.](#)

Rajshankar D, Sima C, **Wang Q**, Goldberg SR, Kazembe M, Wang Y, Glogauer M, Downey GP, McCulloch CA.

PLoS One. 2013 Aug 5;8(8):e70659. doi: 10.1371/journal.pone.0070659. Print 2013.

PMID:

23940616

[PubMed - indexed for MEDLINE]

[Free PMC Article](#)[Related citations](#)

Select item 2389333290.

[The effect of aliskiren on urinary cytokine/chemokine responses to clamped hyperglycaemia in type 1 diabetes.](#)

Cherney DZ, Reich HN, Scholey JW, **Daneman D**, Mahmud FH, Har RL, **Sochett EB**.

Diabetologia. 2013 Oct;56(10):2308-17. doi: 10.1007/s00125-013-3000-3. Epub 2013 Jul 28.

PMID:

23893332

[PubMed - in process]

[Related citations](#)

Select item 2388477691.

[Longitudinal decline of  \$\beta\$ -cell function: comparison of a direct method vs a fasting surrogate measure: the Insulin Resistance Atherosclerosis Study.](#)

Festa A, Haffner SM, Wagenknecht LE, Lorenzo C, **Hanley AJ**.

J Clin Endocrinol Metab. 2013 Oct;98(10):4152-9. doi: 10.1210/jc.2013-1937. Epub 2013 Jul 24.

PMID:

23884776

[PubMed - indexed for MEDLINE]

[Related citations](#)

Select item 2387077592.

[Fasting capillary glucose as a screening test for ruling out gestational diabetes mellitus.](#)

Anderson V, Ye C, Sermer M, **Connelly PW**, **Hanley AJ**, Zinman B, Retnakaran R.

J Obstet Gynaecol Can. 2013 Jun;35(6):515-22.

PMID:

23870775

[PubMed - indexed for MEDLINE]

[Related citations](#)

Select item 2386465193.

[The identification of novel proteins that interact with the GLP-1 receptor and restrain its activity.](#)

Huang X, Dai FF, Gaisano G, Giglou K, Han J, Zhang M, Kittanakom S, Wong V, Wei L, Showalter AD, Sloop KW, Stagljar I, **Wheeler MB**.

Mol Endocrinol. 2013 Sep;27(9):1550-63. doi: 10.1210/me.2013-1047. Epub 2013 Jul 17.

PMID:

23864651

[PubMed - indexed for MEDLINE]
