### MESSAGE FROM THE DIVISION DIRECTOR

#### Academia-industry relations in Endocrinology and beyond – a new era

Very significant changes have occurred over the past decade in the relationship between the medical profession, and in particular those working in academic institutions, and the pharmaceutical industry. A series of ever more stringent guidelines and regulations have been introduced governing this relationship, most of which have been voluntarily self-imposed by the industry itself as well as professional organizations, universities and academic hospitals. As you know by now the Faculty of Medicine, University of Toronto has created its own guidelines <http://www.deptmedicine.utoronto.ca/AssetFactory.aspx?mode=download&did=2593>. I do not intend to review or focus on the specifics of those guidelines here. Suffice it to say that we are all relieved that unsavoury practices of the past, with their terrible optics and concerning implications for patient care, have mostly been corrected, although abuses continue to occur. I do however want to speak about the next phase of our relationship with industry as we move forward. I respect the fact that my opinions may or may not be shared by all members of the division. We each have our own style and comfort level in interacting with industry.

As a researcher, prescribing physician and expert in a niche area as well as in my roles as Director of the Division of Endocrinology and BBDC, I have many interactions with the pharmaceutical industry. My **first point** and strong opinion, therefore, is that it is critically important for Academia and Industry to develop strong relationships and to interact at many levels. Those in favour of shunning the pharmaceutical industry, resulting in non-interaction between two solitudes, miss numerous opportunities to enhance patient care by contributing to high quality educational programs, research into new devices and treatments, enhancing the education of professionals working in the pharmaceutical industry itself, providing useful, non-biased advice to pharmaceutical companies in their research, development and even in their marketing programs, benefiting from their knowledge and working together to enhance our academic programs. My **second point** is that as physicians we are powerless to improve patient care without tools (devices and drugs). Imagine trying to lower LDL-c without statin drugs, lower BP without antihypertensives, etc. We would be as powerless as we are today in treating obesity, in which we currently have no effective, safe, durable treatments other than bariatric surgery. Pharmaceutical companies invest millions of dollars in R&D but they need to interact with professionals outside their organizations. We need to give credit where credit is due and where possible feel very comfortable participating in the R&D process. **Third**, pharmaceutical companies invest millions of dollars every year in continuing health education and professional development. Over the past 24 years since my first appointment at U of T, I am proud of having contributed to the education of fellow professionals in the diabetes and hyperlipidemia therapeutic areas. I have very strict rules and self-imposed lines which I try never to cross. I openly declare my conflict of interest, I am very selective in the programs I participate in (I turn down dozens of invitations every year), I never promote specific therapies and I clearly differentiate my role as educator from that of the sales staff of pharmaceutical companies. Promotion can be done in subtle (actually usually not so subtle) ways; I never highlight specific therapeutics or clinical trials that focus on a particular agent. I am most proud when I receive feedback along the lines of 'that was one of the most useful and valuable learning experiences and so refreshing to have been completely unbiased'. **Forth** – particularly in my role as Director of the Banting and Best Diabetes Centre I am engaged in very large fundraising, a sizeable proportion of which is from the pharmaceutical industry. We continue to enhance our academic programs with the generous support of industry partners. We are very careful not to have any 'strings attached' and at times we have been known to walk away from a potential million dollar donation if we feel uncomfortable with the terms of that donation. I am extremely grateful to those companies that have had the vision to invest in the really meaningful work that we do to tackle the diabetes epidemic. These investments by industry do not have a direct return on investment (ROI), instead they bring added value to the company's profile as a responsible partner in health care. For example we have received millions of dollars in the form of Chairs, Professorships, Knowledge Translation Program,

Director of Diabetes Education, professional conferences, studentships, fellowships and peer-reviewed funding programs.

My overall message therefore, is that close interaction between our Division and the Pharmaceutical industry, providing it is managed in a highly ethical fashion, is of great mutual benefit and should be encouraged. We can comfortably move into a new era of academia-industry relations but should never lose site of the potential for these relationships to get derailed and revert back to some of the embarrassing abuses of the past.

Gary Lewis  
Director, Division of Endocrinology, U of T

### **HONORS AND AWARDS ANNOUNCED IN THE PAST 6 MONTHS (SINCE SPRING NEWSLETTER)**

#### **Teaching Awards:**

**Jackie James** – recipient of the 2014 U of T Department of Medicine Teaching Award

**Adam Millar** – recipient of the U of T George From Postgraduate Teaching Award for 2014

**Adam Millar** – recipient of the U of T Robert Volpe Undergraduate Teaching Award for 2014

#### **Special recognition for Research:**

#### **The following individuals successfully passed their 3-year review earlier this year:**

Afshan Zahedi

Phil Segal

#### **Promotion to Professor:**

Tony Lam

#### **Promotion to Associate Professor:**

Lorraine Lipscombe

Sheila Laredo

### **RESEARCH GRANTS**

#### **Operating Grants**

CIHR March 2014 Operating Grant Grantees

CONNELLY, Philip W	St. Michael's Hospital (Toronto)	Operating Grant	201403	CSC	Investigating the role of red blood cells in oxidative stress and thrombogenesis - from 4-hydroxynonenal chemistry to mouse to man. <a href="#">Details...</a>	\$451,101	4 yrs 0 mth
DRUCKER, Daniel J	Mount Sinai Hospital (Toronto)	Operating Grant	201403	DOL	Glucagon receptor and the control of metabolism <a href="#">Details...</a>	\$749,366	5 yrs 0 mth
RETNAKARAN, Ravi R	Mount Sinai Hospital (Toronto)	Operating Grant	201403	CIC	Exenatide and Insulin Glargine Combination Therapy for the Preservation of Pancreatic Beta-cell Function in Early Type 2 Diabetes: A Randomized Controlled Trial <a href="#">Details...</a>	\$366,920	3 yrs 0 mth
WHEELER, Michael B	University of Toronto	Operating Grant	201403	DOL	Mechanisms linking beta cell dysfunction to type 2 diabetes <a href="#">Details...</a>	\$1,025,435	5 yrs 0 mth

**Dr. Bruce Perkins** was awarded a NIH funding – a \$1.1M multi-site grant through the NIH DP3 platform for his work in diabetic neuropathy (corneal confocal microscopy).

[CDA Sept 2013 Grant-in-Aid grantees](#)

**Dr. Andrew Advani** Award type: Operating Grant Project, Title: Epigenetic regulation of podocyte oxidative stress in diabetic nephropathy. See more at:

<http://www.diabetes.ca/research/research-grants-awards-competitions/2014-research-competition#sthash.CycjR8FG.dpuf>

**Dr. Anthony J. G. Hanley** Award type: Operating Grant Project, Title: Role of soluble CD163,

a marker of adipose tissue macrophage infiltration, in the etiology of type 2 diabetes. See more at: <http://www.diabetes.ca/research/research-grants-awards-competitions/2014-research-competition#sthash.CycjR8FG.dpuf>

**Dr. Vladimir Vuksan** Award type: Operating Grant Project, Title: Co-administration of three complementary therapies (viscous dietary fiber, whole grain and ginseng) for comprehensive risk reduction in Type 2 Diabetes See more at: <http://www.diabetes.ca/research/research-grants-awards-competitions/2014-research-competition#sthash.CycjR8FG.dpuf>

**Tony Lam** – received a Canada Foundation For Innovation (CFI) Leaders Opportunity Fund – The in vivo metabolic characterization laboratory (Principal Investigator, \$1,917,912)

**Iilana Halperin, Geetha Mukerji, Phil Segal, Jeannette Goguen, Maria Wolfs** received a 2013-2014 Sunnybrook Innovation Funding Grant for \$86,873 for their project titled 'Developing an Innovative Balanced Scorecard for Quality in Diabetes Care'

**Dr. Anna Sawka** received a 2-yr grant 2015 from the Cancer Research Society for \$ \$57,650 for her project titled 'A detailed spatial analysis on contrasting cancer incidence patterns in thyroid lung cancer in Toronto Women'

### **DIVISION MEMBER PROFILE – Caroline Kaercher Kramer, UHN-MSH Division**

Dr. Kramer grew up in Porto Alegre which is the capital of Rio Grande do Sul, the southern-most state of Brazil. Since her childhood, Dr. Kramer wanted to become a physician and she has always been excited about understanding the human body and physiology. In 2002, she received her M.D degree from the Universidade Federal de Ciencias da Saude de Porto Alegre/Brazil. In 2008, after three years of residency in Internal Medicine at the Universidade Federal de Ciencias da Saude de Porto Alegre/Brazil and two years of residency in Endocrinology at the Universidade Federal do Rio Grande do Sul/Brazil, she received her specialist degree in Internal Medicine/Endocrinology.

Despite her enthusiasm for being a doctor in a developing country, she knew that conducting medical research would be the focus of her career ever since her first experience with research in her early years of medical school. She has worked on clinical research ever since, leading to several experiences in different areas of investigation until she found that diabetes research was the most interesting and attractive field to her. After completing her M.D. degree in

Brazil, she went on to PhD studies that were partly undertaken at the University of California San Diego (USA), where she worked on the Rancho Bernardo Study, a well-known cohort study pertaining to diabetes and metabolism. After completing her PhD in 2009, she returned to Brazil where she has worked as a clinical endocrinologist, while also conducting research with a Brazilian group. In August 2012 as a recipient of the Canadian Diabetes Association post-doctoral fellowship award, she came to Toronto to undertake a 2-year research fellowship under the supervision Drs. Bernard Zinman and Ravi Retnakaran at the University of Toronto, an experience that would be life-changing. Dr. Kramer will join the University of Toronto, Division of Endocrinology and Leadership Sinai Centre for Diabetes/Mount Sinai Hospital as an Assistant Professor and Clinician-Scientist in October 2014.

Her clinical research work has focused on the pathophysiology and risk factors for the development of type 2 diabetes mellitus (T2DM), risk factors for cardiovascular disease in individuals with metabolic abnormalities, and strategies for the treatment of T2DM. To date, her research has yielded 56 original peer-reviewed publications (32 first-authorships), including first-authorship publications in high-impact general medical journals such as *Annals of Internal Medicine* and *British Medical Journal*, and top subspecialty journals in the field of diabetes and endocrinology including *Diabetes*, *Diabetes Care* and *Journal of Clinical Endocrinology and Metabolism*.

In her spare time, Dr. Kramer enjoys meeting with friends, reading all kinds of books, and watching movies. She is particularly excited about the cultural life in Toronto and enjoys attending concerts and shows. Although she misses the beaches of Brazil, she is looking forward to establishing her independent research program in the rich academic environment of the University of Toronto diabetes research community.
